

## E-Cigarette and Vaping Presentations

**“Vaping”** is a term introduced by the electronic nicotine delivery system (ENDS) industry to refer to any electronic vaporizer, also known as E-cigs, vapes, vape pens and E-hookahs. Though originally designed as harm reduction products for cigarette smokers, they have recently morphed into a trend that is becoming increasingly popular with youth. This rise in use is of concern for health professionals, educators, and parents, in part because of the common misconception that these products are harmless and because long-term consequences are still not known.

**Caron Treatment Centers’ Student Assistance Program can provide educational presentations to various audiences.**

- Programming for students will include information on the potential health consequences and will emphasize the importance of remaining substance-free.
- Programming for parents and professionals will provide up-to-date trends in adolescent use and will highlight effective communication strategies

**For more information about these programs or about Caron’s Student Assistance Program, please visit [www.CaronSAP.org](http://www.CaronSAP.org) or call 610-743-6117**
